Topics: Epidemiologic terms, data and reports used in the planning process, funding sources

Early Identification of Individuals with HIV/AIDS (EIIHA) Update: TBD

Part A Assessment of the Administrative Mechanism: July 13

HIV Clinical Update: August 10

Attendance at these trainings is **highly recommended**. The Ryan White HIV/AIDS Program Planning Council Primer stipulates members need to learn how to participate in the many tasks involved in RWHAP planning. Planning councils must provide orientation for new members, covering topics such as the legislation and their roles and responsibilities in planning, as well as those of the recipients. All planning council members should receive periodic training to help them carry out their roles.
