

Ryan White Program
Service Area Standards: Home and Community-Based Health Services

Vision: People living with HIV experiencing illness or disability will be supported to remain independent in the community

Service Category Description: Home and Community-Based Health Services are provided to a client living with HIV in an integrated setting appropriate to a client's needs, based on a written plan of care established by a medical care team under the direction of a licensed clinical provider. Services include:

- Appropriate mental health, developmental, and rehabilitation services
- Day treatment or other partial hospitalization services
- Durable medical equipment
- Home health aide services and personal care services in the home

Program Guidance: Inpatient hospitals, nursing homes, and other long-term care facilities are not considered an integrated setting for the purposes of providing home and community-based health services.

All subrecipients must meet universal standards requirements in addition to service area standards for which they are funded.

Standard	Measure	Data Source
Individual Client Focused Standards		
1. Site: Services are provided in the home of a client with HIV/AIDS or in a community-based setting such as an adult day center.	1. Documentation that the services are being provided in an HIV-positive client's home or community-based setting per the care plan.	1. Client file review/ site visit
2. Referral: There is a referral from an HIV primary care provider or medical case manager based on a care plan or Acuity Assessment.	2. Referral documentation and ROI from client's primary care clinic or medical case management agency.	2. Client file review/ site visit: written referral (or notes about a phone referral) and ROI
3. Eligibility: Program has system in place to check all clients' eligibility for Home and Community-Based Services provided by Medicaid Waiver before delivery of services, to ensure Ryan White Services are provided as the payer of last resort.	3.
